DETAILED ACTION

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 41-76 are rejected on the ground of nonstatutory double patenting over claims 1-40 of U. S. Patent No. 6,621,503 since the claims, if allowed, would improperly extend the "right to exclude" already granted in the patent.

The subject matter claimed in the instant application is fully disclosed in the patent and is covered by the patent since the patent and the application are claiming common subject matter, as follows: displaying together a first indicia of a first time based stream of information and a second indicia of a second time based stream of information, the first and second time based streams of information being correlated with each other in time; displaying a plurality of edit point markers together with the first indicia and the second indicia, the plurality of markers

Application/Control Number: 10/635,881

Art Unit: 2173

defining a first selected amount of time of the first time based stream of information and a second selected amount of time of the second time based stream of information, the plurality of markers being adjustable in response to user input so that the first selected amount of time is different from the second selected amount of time; and editing a third time based stream of information and a fourth time based stream of information according to the plurality of markers to include the first selected amount of time of the first time based stream of information and the second selected amount of time of the second time based stream of information in the third and fourth time based streams of information respectively.

Furthermore, there is no apparent reason why applicant was prevented from presenting claims corresponding to those of the instant application during prosecution of the application which matured into a patent. See also MPEP § 804.

Allowable Subject Matter

Claims 41-76 are allowed over the prior art of record.

Applicant has claimed uniquely distinct features in the instant invention which are not found in the prior art either singularly or in combination. They are a method displaying plurality of edit point markers together with the first indicia and the second indicia, the plurality of markers defining a first selected amount of time of the first time based stream of information and a

Art Unit: 2173

second selected amount of time of the second time based stream of information, the plurality of markers being adjustable in response to user input so that the first selected amount of time is different from the second selected amount of time; and editing a third time based stream of information and a fourth time based stream of information according to the plurality of markers to include the first selected amount of time of the first time based stream of information and the second selected amount of time of the second time based stream of information in the third and fourth time based streams of information respectively. These features are not found or suggested in the prior art. The closest prior art, Shore and Mincy discloses a conventional the timeline visually reflects the sequence and duration of play of the clips located on the timeline. The user is then able to edit the timeline by editing the sequence, duration and start and end points of the different clips on the timeline; either singularly or in combination, fail to anticipate or render the above underline limitation obvious.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure (see PTO-892).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Cao (Kevin) Nguyen whose telephone number is (571)272-4053. The examiner can normally be reached on 8:30AM-5:00PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, John Cabeca can be reached on (571)272-4048. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
